

## Intro

From elementary school to high school, there is a similar educational environment, but from college or university, the environment is completely different from previous educational institutions. However, freshmen or introverted students tend to miss out on many of the opportunities and information provided by the college or university. We aim for a convenient and valuable school life for all college students.

## Key feature

Users can share information with students at their school, provide easy-to-read school news, create and join various clubs, student reviews of professors' teaching styles, mobile ordering at the school cafeteria, etc.

## Business opportunity

It appears that students and professors at universities or colleges in British Columbia will mainly use this service. Additionally, companies can also post job advertisements to students at various universities through this app. Most companies post job postings with various qualifications on a job post site or app. If they do it through this service, it will be easier for students from schools and programs desired by each company to access their job postings.
